# United Orthopedic Milestones

# Vertical Integration

We are highly differentiated in the medical device world because of our vertically integrated business model.

This vertical integration allows us to be both  
Responsive and Versatile

# What does Versatility and Responsiveness mean for the US Market?

We believe **United Orthopedic**  
is best positioned to meet the  
challenges facing the US Recon  
Orthopedic market over  
**the next decade +**

## Over the next decade we intend to...

Supply modern, high quality 'metal and plastic' at the price points needed by the industry due to procedural reimbursement dynamics.

Provide a full-line of hip and knee reconstructive orthopedic products including supporting complex cases such as limb salvage and oncology procedures.

Work with dynamic and innovative surgeons to develop truly-needed innovation to better serve our surgeons, hospitals, surgery centers and other partners.

Offer high quality distributor agent partners the opportunity and support needed to grow their business by providing access to expanded territory, advanced products, technologies and technical expertise.

Collaborate to be an open-source partner to support integrating Computer Assisted Surgery (CAS) solutions into the operating theater.
