YEARS

# OUR HISTORY

**Jason Lin** Chairman of the Board

United Orthopedic was founded by Jason Lin who, after years of serving orthopedic surgeons as a distributor, cared deeply about providing surgeons with greater access to high quality orthopedic solutions. In 1993, Lin brought together surgeon thought leaders, engineers, and manufacturing professionals to explore innovative, cost-effective ways to create improved and advanced orthopedic surgical solutions. Today, the company is led by CEO Calvin Lin, who continues to drive the mission of innovation and excellence in the orthopedic industry.

By listening to what surgeons were asking for, and by integrating the design and production processes, United Orthopedic was able to create high quality, versatile products and provide greater responsiveness to surgeons' needs and, in turn, improving the clinical outcomes for their patients.

## ACCOUNTABILITY

Embrace the company missions. Act proactively and responsively.

## HAPPINESS

Enjoy your life. Together we dedicate to building a healthier community.

## INNOVATION

Be original and creative. Champion ideas that add value to the well-being of humankind.

# VISION

To evolve orthopedic care  
efficiently

# MISSION

To be the most responsive  
orthopedic company that improves  
patient care by relentlessly  
elevating quality and innovation

---

UNITED  
ORTHOPEDIC®

**IN THE US MARKET**

---

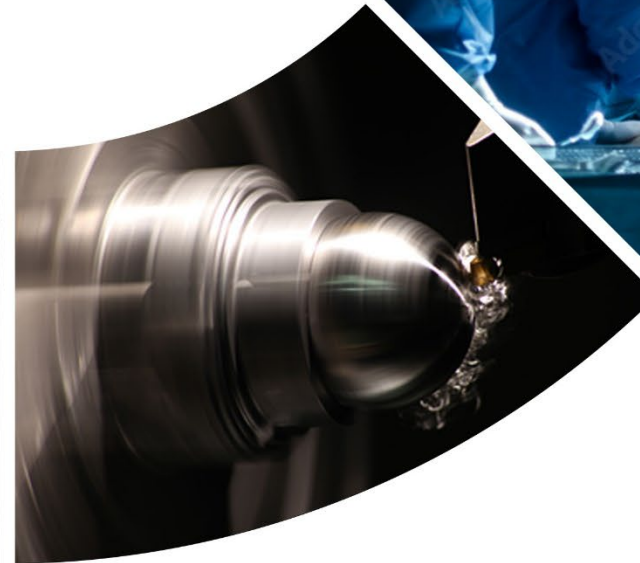

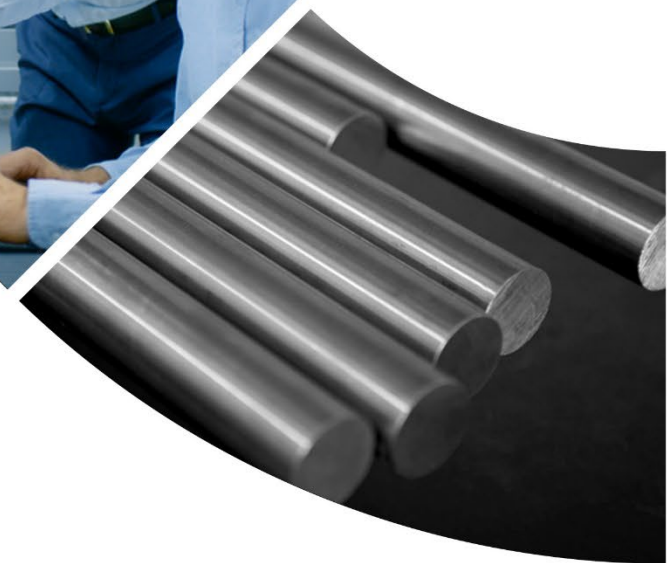

# WHAT DOES RESPONSIVENESS MEAN FOR THE US MARKET?

---

We believe **United Orthopedic** is best positioned to meet the challenges facing the US Recon Orthopedic market over **the next decade +**

# VERTICAL INTEGRATION

## RESEARCH & DEVELOPMENT

Rooted in caring about patients, listening to our customers, and responding directly to their surgical needs.

## MATERIAL SOURCING & PROCESSING

To achieve our vision, we've developed a proprietary vertically-integrated manufacturing model, starting with direct raw material sourcing.

## PRECISION MANUFACTURING

We control every critical step in the process including metal forming, precision machining, surface treatment, inspection and quality control.

## MEDICAL EDUCATION & TECHNICAL SUPPORT

We are dedicated to providing continuous education to next-gen surgeons & delivering top quality & versatile solutions efficiently from conceptual design to the OR.

# OVER THE NEXT DECADE WE INTEND TO...

---

Provide a comprehensive range of orthopedic products for hip and knee reconstruction, including complex cases like limb salvage and orthopedic oncology procedures.

Empower top-tier distributor agents with the support to expand their business through access to extended territories, advanced products, cutting-edge technologies, and technical expertise

Supply modern, high quality 'metal and plastic' at price points required by industry reimbursement dynamics.

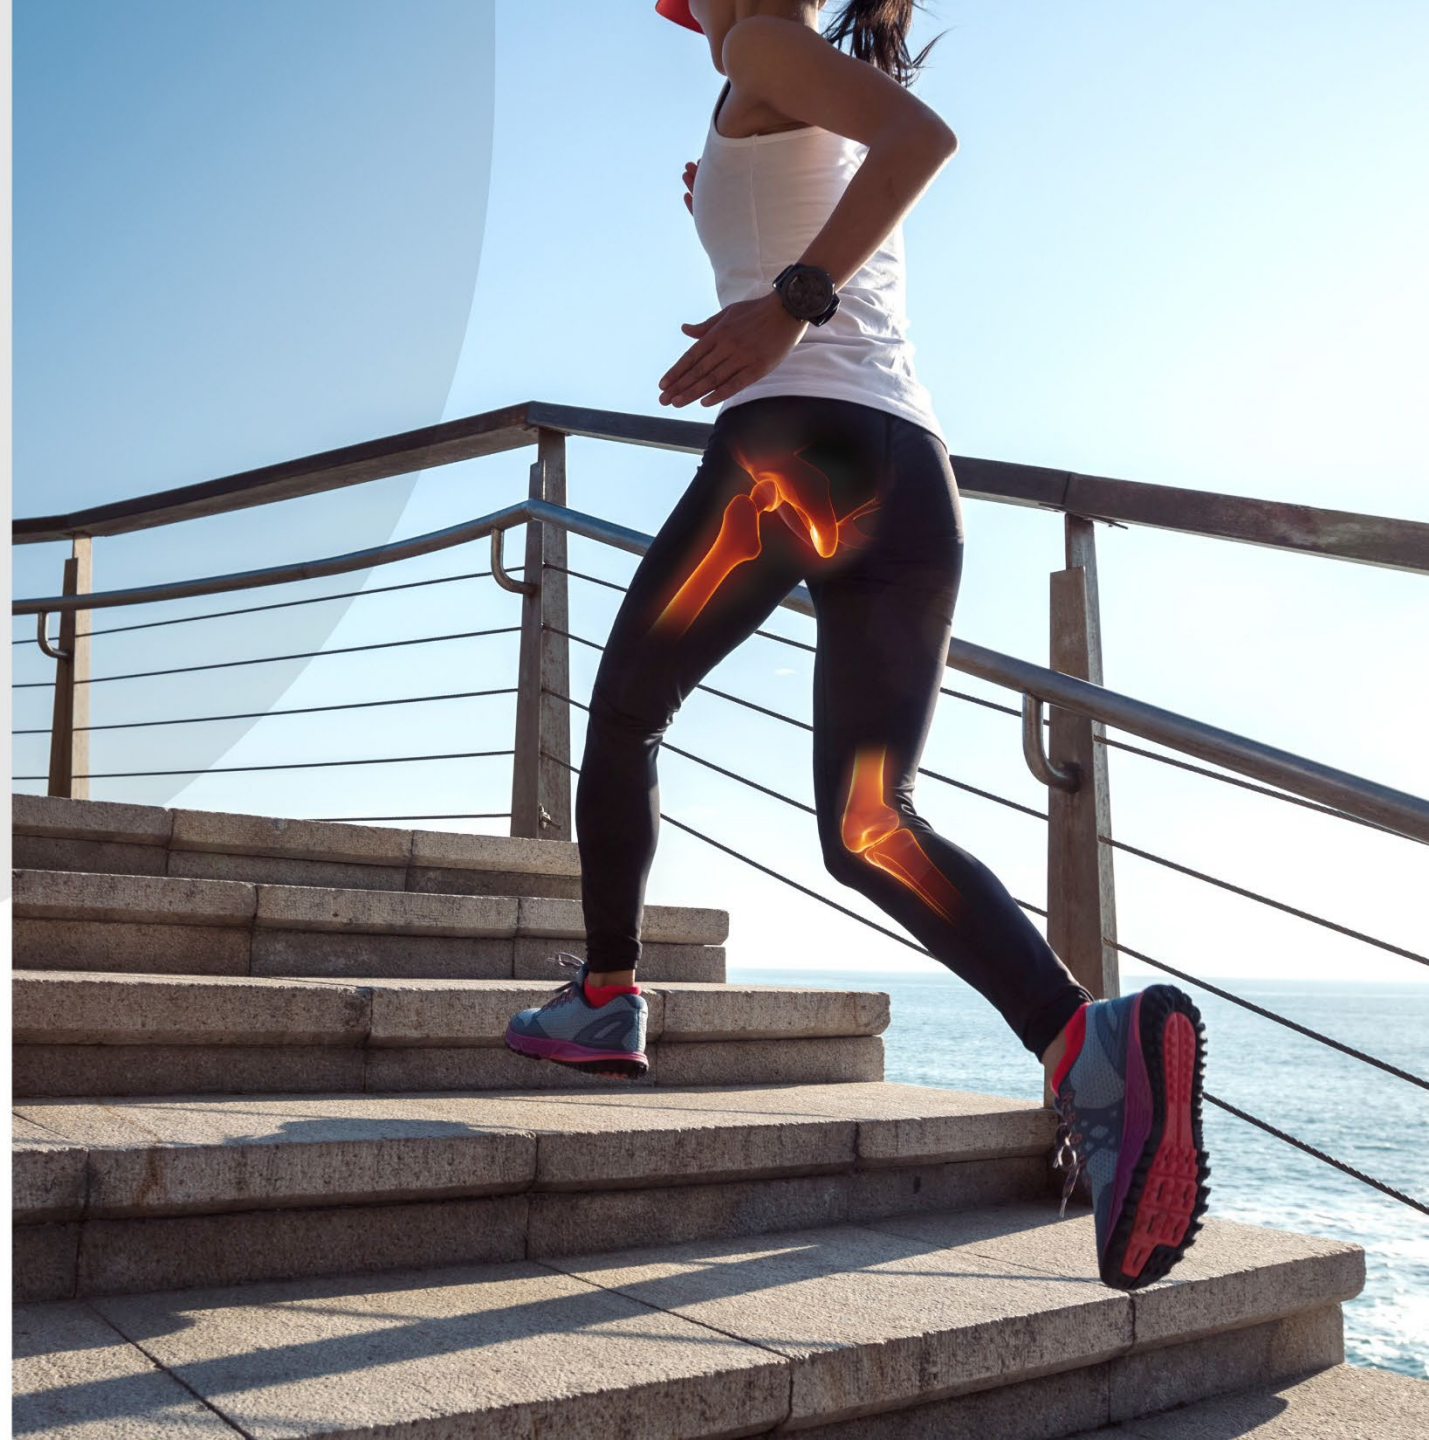

Partner with dynamic surgeons to innovate and meet the essential needs of our partners, including hospitals, surgery centers, and other stakeholders.

Collaborate as an open-source partner to seamlessly integrate Computer Assisted Surgery (CAS) solutions into the operating theater.

# PRODUCT OFFERINGS

Our commitment is to offer a comprehensive orthopedic solution that covers knee and hip replacements, spanning from primary, complex revisions, and limb salvage.
